information

A centrally managed accommodation model

The accommodation partner – **Leading** – brings strong experience in international events, proven knowledge of Lisbon’s hotel market and operational capacity to manage an accommodation process at the scale of WG2027.

The model is designed as a centrally managed solution, covering the full accommodation journey: reservations, confirmations, payments, invoicing, rooming lists and participant support.

National Federations will benefit from a clear and dedicated booking process, supported by multilingual communication, dedicated contact channels and onsite assistance during the event.

The model has contingency procedures for unavailability, overbooking, last-minute changes, complaints and critical arrival/departure periods, ensuring a reliable and responsive accommodation operation.

Hotel categorisation: stars & areas

The accommodation model is based on the combination of hotel category, Lisbon area and room type. This ensures that prices reflect the location, accessibility and operational suitability.

The use of 3, 4 and 5-star rating provides a global reference, while the area distribution adds the local Lisbon context: proximity to the venue, mobility, accessibility and overall event experience.

This makes the offer easier for the NFs to compare and book.
